

Disclosures:

Submitted for publication October 6, 2020. Accepted for publication March 8, 2021.

Acknowledgments: The authors are grateful for the critical comments and helpful suggestions from the handling editor and anonymous reviewers, who helped to sharpen this work into the current form, which is greatly improved from its initial version.

Research Support: This work was supported by the Department of Anesthesiology, University of Pittsburgh, School of Medicine, Pittsburgh, Pennsylvania. Significant research funding and salary support was provided by a Mentored Research Training Grant (to Dr. Vogt) from the Foundation for Anesthesia Education and Research (Schaumburg, Illinois; MRTG-CT 2-2017). Salary support for Dr. Vogt during early development work directly related to this project was supported by an institutional training grant (T32GM075770), and support during data analysis and manuscript preparation came from a career development award (K23GM132755), both from the U.S. National Institutes of Health (Bethesda, Maryland), specifically the National Institute of General Medical Sciences (Bethesda, Maryland). Additional financial support for Dr. Vogt came from the National Institutes of Health Clinical Loan Repayment program (L30GM120759). Subject recruitment was assisted by the University of Pittsburgh Clinical Translational Science Institute Research Participant Registry, a project supported by the National Institutes of Health (UL1TR000005).

Competing Interests: The authors declare no competing interests.
