Nugent , Ketamine Alters Electrophysiological Responses to Emotional Faces in Major Depressive Disorder, *Journal of Affective Disorders* (2020), doi: <https://doi.org/10.1016/j.jad.2020.10.007>

Funding and Role of Funding Source

This work was supported by the Intramural Research Program at the National Institute of Mental Health (NIMH), National Institutes of Health (NIH; ZIAMH002857; NCT00088699), by a NARSAD Independent Investigator Award to CAZ, and by a Brain and Behavior Mood Disorders Research Award to CAZ. NBL was additionally supported by the NIH (T32 MH103213) and the National Science Foundation Graduate Research Fellowship Program (NSF GRFP 1342962). These organizations had no further role in study design; in the collection, analysis, or interpretation of data; in the writing of the report; or in the decision to submit the paper for publication.

Author Contributions

NBL: helped conceptualize, investigate, and administer the project; processed and analyzed the data; wrote the original draft of the manuscript; approved the final version of the manuscript.

LS-F: processed and analyzed the data; wrote the original draft of the manuscript; created the figures; approved the final version of the manuscript.

JRG: reviewed the manuscript for critical intellectual content; provided research supervision; approved the final version of the manuscript.

FWC: prepared and optimized the analysis methodology and software; processed and analyzed the data; reviewed the manuscript for critical intellectual content; provided research supervision; approved the final version of the manuscript.

MLF: helped conceptualize, investigate, and administer the project; reviewed the manuscript for critical intellectual content; provided research supervision; approved the final version of the manuscript.

CAZ: acquired funding; helped conceptualize, investigate, and administer the project; reviewed the manuscript for critical intellectual content; provided research supervision; approved the final version of the manuscript.

ACN: helped conceptualize, investigate, and administer the project; prepared and optimized the analysis methodology and software; processed and analyzed the data; created the figures; reviewed the manuscript for critical intellectual content; provided research supervision; approved the final version of the manuscript.
